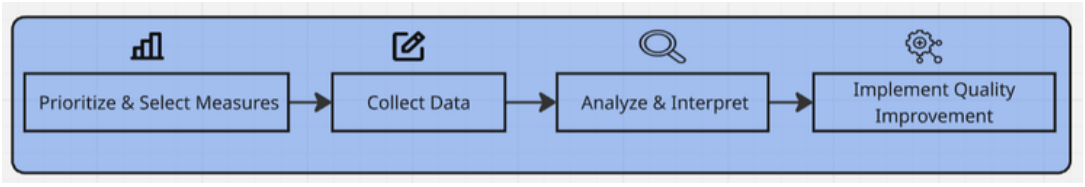
From Data to Improvement

A reminder for selecting future QIP Opportunities

Quality improvement starts with understanding your data. When identifying opportunities for future Quality Improvement Projects (QIPs), review the performance measures for all applicable core service categories your agency is funded to provide. Looking accross measures can help identify gaps, variation, and areas that may warrant further investigation.



Before selecting a future QIP, run and review your applicable performance measures. A noticeably low measure may signal an opportunity for improvement. Low percentages should be investigated further before an intervention is selected. Remember: A low percentage is a starting point for investigation, not automatically the QIP itself. Ask why the performance is lower, examine the underlying process, and identify contributing factors before selecting an intervention. The goal isn't simply to improve the number. It is to improve the process that produces the number.

Multiple Performance Measures Report 8/31/2026

Selection:

Code:	Name:	Numerator:	Denominator:	Percent:
C5-MCM	MCM Annual Retention in Care	48	120	40.00%
C5-OAHS	OAHS Annual Retention in Care	113	168	67.26%
0VS-MCM	Medical Case Management: HIV viral load suppressio	110	120	91.67%
0VS-OAHS	OAHS: HIV viral load suppression	162	168	96.43%

I am here to support your agancy with CQM technical assistance an quality improvement activities.
