Aaryana Mostafaeipour	Ryan White Part D University of Nevada, Las Vegas	

Meeting Start Time: 2:00 pm | Meeting End Time: 4:06 PM

Welcome & Introductions

Jessica Rios, CQM Analyst and Program Chair, welcomed attendees and facilitated instructions before reviewing the meeting agenda. Sixteen CQM members and one guest representing Part D attended. An asterisk (*) next to a member's name in the attendance list indicates that they were absent.

Review of Milestones – CQM program chair went over the Las Vegas TGA CQM committee milestones. The review included Lab Data Days completed in each quarter, monthly meetings, quarterly meetings, and (31 current) capacity building, technical assistance and support sessions. Jessica emphasized the importance of leading data driven conversations with internal CQM teams and using this milestones chart to communicate agency leadership the time and effort that goes into this program. See presentation slide #4 for details.

LVTGA Performance Measures (Baseline & Goals) – The committee reviewed Q2 LVTGA 2026 performance measure baselines and end of the year goals that covered EIS Linkage to Care, MCM Viral Suppression, OAHS Viral Suppression, Retained in Care MCM, Retained in Care OAHS, Retained in Care Medical Transportation, Retained in Care Client's Referred for Healthcare and Support Services. See presentation slide #5 & slide #6 for quarterly comparisons, and narrative details. Jessica explained how our LVTGA jurisdiction stratifies data based on race, ethnicity and age groups to make support quality improvement projects

and track progress. Stacked data bars were used to illustrate the percentages of clients meeting and not meeting CQM performance measures. Jessica included counts alongside percentages to provide context for interpreting results, especially among smaller populations. Jessica detailed the quality improvement projects agencies worked on and connected those efforts to the corresponding performance measures. The data was presented by age, race, and ethnicity to highlight differences in outcomes to identify potential disparities. Together, these visuals and project summaries helped communicate provider efforts, areas of progress, and opportunities for targeted improvement. See slides 7 through 20 for the demographic breakdown.

QIP outcome reports were presented by the following committee members on behalf of their respective agencies:

- Christine Baron – UMC: MCM Retention in Care
- Bobby Milam – AHF: Early Intervention Services
- Lisa Haymon – CAN: MCM Viral Suppression & MCM Retention in Care
- Victor Hernandez – COMC: MCM Viral Suppression
- Dr. KayLynn Bowman - Dignity Health: MCM Viral Suppression
- Anita Lockhart – NYE: MCM Viral Suppression
- Veronica Arana - The Center: OAHS Retention in Care
- Ronny Soy – SNHD: Early Intervention Services

Participating agencies were thanked for their work completing quality improvement projects and presenting their outcome reports.
